Like all Americans, we are united in the all-out effort to win the war. During the stress of this war-time economy we have asked ourselves "What can we do to help win the war?" We have found the answer in "Garden for Victory", a theme meeting the requirements of the times.

As we probe the meaning of this theme, we find definite and practical ideas suggesting themselves which, in turn, will materially help achieve the goal we are all striving for.

Vegetable Gardens should be planted in greater numbers to conserve our food stocks. Likewise, fruits, particularly the bush types such as berries, grapes, etc., should be increased. Then in addition, let us not lose sight of the tremendous effect on morale to be obtained through a program of beauty and cleanliness. Beauty and cleanliness about our homes and cities builds morale. Morale is the thing that wins wars. So, encourage and assist cleanup programs, beautification projects, city and street ornamentation. "Garden for Victory."

WHEN ORDERING

—write name and address plainly. Order early in order to insure delivery of stock wanted. Remittance must accompany order. Stamps are accepted up to \$1.00. Money orders, express orders, bank drafts and certified checks preferred. Because our merchandise is extremely perishable, we do not ship C. O. D. Owing to the fact that there are invariable shortages of some varieties, we kindly ask that customers state their permission for us to substitute the nearest variety to the one ordered in case we should be sold out.

Because all of our business comes with a rush in an extremely short portion of the year, mistakes sometimes creep in. In case of complaint, please write us promptly. We will do all in our power to immediately and courteously rectify the error.

While we hold ourselves in readiness, on proper proof, to replace free of charge all stock that may prove untrue to label, or refund the amount paid, we give no warranty expressed or implied as to description, quality, productiveness or any other matter of any stock, seeds, bulbs, or plants we sell.

This is what makes plants and flowers beautiful and vegetables yield larger, earlier crops.

Your potted plants, flower boxes and outdoor garden flowers can easily be made lovely, healthy, strong and covered with green foliage while the blooming type will reward you with quantities of sweet scented blossoms, by feeding them regularly with Fulton's Plantabbs.

Vegetables amaze with earlier maturity and increased yields when fed this excellent plant food.

Fulton's Plantabbs are clean, odorless, easy to use TABLETS providing a full measure of rich foods PLUS all the Vitamin B-1 needed by deficient plants. Concentrated, yet so safe will not burn even tenderest foliage.

Plant like seed near stems or easily made into rich liquid fertilizer. We recommend them highly and suggest the larger sizes for economy.

OUR SERVICE PLANT

ARISTOCRATS OF THE GARDEN

We take pleasure in offering a list of some of the newer, finer varieties of trees, shrubs and plants for your garden. In the average garden, space is limited, consequently it is more important to select the better things. To bring some of these things to your attention we present this page—"Aristocrats of the Garden."

VIBURNUM BURKWOODI

This is among the most valuable novelties in flowering shrubs that have appeared in recent years. It was originated in England (where it took all possible awards) as the outcome of a cross between the well-known deciduous *Viburnum carlesii* and the little-known evergreen *V. utile*. The result is a fast growing, very hardy, semi-evergreen shrub bearing flowers as fragrant as those of *V. carlesii* but in far larger heads up to four inches broad and containing as many as 250 individual flowers. These are pinkish in the bud but open white and here appear about a month sooner than *V. carlesii*. Foliage is rich glossy green; some of it turns purplish bronze with winter weather. We believe that this is sure to become one of America's most popular shrubs. Each \$2.00, not prepaid.

GINKGO BILOBA (Maidenhair Tree)

The common name is very apt as the leaves are shaped like those of Maidenhair Fern. In spite of appearances it is really of coniferous type. One of its great charms is the pure gold of its leaves in Autumn. It has been said that it drops all its leaves in a single night, but that is only poetic exaggeration. Still it doesn't take many nights so for several days it stands on a golden carpet. It is also claimed that it is no longer growing wild anywhere in the world but has been preserved from antiquity around temple grounds in the Orient and has been distributed as an exotic all over the temperate regions of the world. Makes a large tree eventually so should be given plenty of room to develop. Each 5-6 ft., \$2.50, not prepaid.

LABURNUM VOSSI (Goldenchain)

A small tree with green bark and foliage like exaggerated clover leaves. Flowers are pure golden yellow and formed exactly like those of Japanese Wisteria. The hanging clusters attain as much as 18 to 20 inches in length and are borne very profusely in late spring. Very beautiful and even the smallest size will usually bloom the first year. Well worth a place in any garden. Each, 6 to 8 ft., \$2.50, not prepaid.

TUBEROUS BEGONIAS

Here is a plant that requires the very situation which normally causes the most difficulty, namely, shade. The Camellia type which we carry have lovely double flowers, in a fine variety of colors including red, pink, orange, and apricot shades. Like all Begonias they are in bloom constantly throughout the summer. There are two requirements for success. They must be planted in the shade and, secondly, they must have an ample application of manure stirred through soil plus a mulch of manure or peat moss on top. Another nice feature of this plant is that the bulb may be saved over winter and used again. Dormant bulbs in red, pink, apricot, yellow, orange and white. Each 20c; 6 for \$1.10; 12 for \$2.00, postpaid. See inside front cover for color illustration.

CORNUS FLORIDA RUBRA (Pink Flowering Dogwood)

There are no trees or shrubs which possess a larger measure of attractiveness throughout the whole year. The rare pink Dogwood is similar in all respects to the common variety except that the flowers are a beautiful shade of pink. A good specimen in full bloom is a magnificent sight in spring. Does well in shade. Each, 3 ft., not prepaid, \$3.50.

PYRACANTHA LALANDI (Firethorn)

A most remarkable fruiting evergreen shrub. Bears attractive large trusses of white flowers during the late spring followed by an abundance of brilliant orange-scarlet berries which remain late into the winter. A marvelous plant for foundation planting where soil is dry. The long shoots it makes can be used as a vine over a doorway or along a window casing. The plants can be trimmed to fit any position. It is difficult to transplant old or large plants. We therefore send only young stock which establishes quickly. 4 in pots, each, prepaid, 75c.

LOCUST—Idahoensis Lavender

A very beautiful addition to the flowering Locust varieties. Flowers are pretty shade of lavender, borne in clusters in great profusion. The tree is top-grafted onto common Locust at about 4 ft. It is fast growing and hardy. Like all Locusts it is easy to grow. Each, not prepaid, 8 to 10 ft., \$2.50.

DAPHNE CNEORUM (Rock Daphne)

A gem for the rock garden or for edging borders. A dwarf evergreen shrub of trailing habit with leaves of dark glossy green, glaucous beneath. Small, tubular, rose-pink flowers of spicy fragrance are borne in clusters in May and again in late September. Trimming in early summer will keep it compact and luxurious, and encourage even more profuse flowering. Every garden should have one or more of these gems. Each, not prepaid, \$1.00.

MAGNOLIA SOULANGEANA

It makes a small tree with gorgeous shining foliage and in early spring produces its enormous, pinkish white flowers, more or less purplish outside and slightly fragrant. This Magnolia is the showiest of the family for planting in northern gardens, and when in bloom, even one plant will dominate the garden—yes, the neighborhood, if it is a sizeable specimen. The size of the individual flowers and the profusion with which the plant blooms makes it one of the most valued plants in cultivation. Each, not prepaid, \$6.00.

AZALEA MOLLISS

A close blood relation of the Rhododendron, Azaleas are so lovely they are fascinating to behold. The Molliis variety is probably the easiest to grow in our section and when planted in a partial shady location, and with plenty of peat moss or leaf mold worked into the soil, they perform beautifully. Colors vary slightly from yellow to orange, but each shade is brilliant. Foliage is good although somewhat sparse and like all deciduous shrubs drop their leaves in the fall. Each, 12 to 15 inches, not prepaid, \$1.25.

ROSE (Austrian Copper)

This variety is one that should be used more freely in the shrub border. It is large growing, perfectly hardy and easy to grow. It blooms with one magnificent crop of single flowers in June. The color is unique and distinctive, being a rich, light copper. Do not plant this variety with your everblooming types because it grows large and will crowd them. If you want a shrub that is different yet brilliant with a minimum of care, order Austrian Copper. Each, 50c, prepaid.

VIOLA EILEEN

For a number of years the Jersey Gem Viola has dominated the Viola varieties principally because of its rich blue color and continuity of bloom. Now we have a glorified Jersey Gem, the same lovely color, the same wealth of flowers, but adding greatly increased size. There are any number of flowers measuring more than two inches in diameter. Viola Eileen will thrill you. In pots, each 25c; doz. \$2.50, prepaid.

ROSA ROULETTI

Here is a lovely, little rockery or border plant. Growing only a few inches high, it is a garden rose in miniature. Tiny flowers are produced in profusion, and are a delicate pink in color. The leaves resemble the large type but again in miniature. The plant does not require any special care or location, making it a valuable addition to rose family. In pots, each 35c; 3 for 85c, prepaid.

We are inaugurating a new policy of prepaying all transportation charges within 1st and 2nd zone on Ornamental Shrubs. Remember the prices appearing after each variety of shrubs are the prices delivered to your door.

Ornamental shrubs are the foundation of all landscape plantings. In selecting your shrubs, bear in mind their ultimate height of growth. Place tall growing varieties in the background or in corners where height is needed. ARBOR VITAE

EVERGREENS

Evergreens, with their beautiful symmetry and their richness of color, add grace and dignity to the landscape design as no other nursery product can. Within the past few years, evergreens have gained in favor for the planting of the home so that now, the modern design calls for practically all evergreens. And this favor has been justly won for, in winter as well as summer, their wonderful shapeliness and their gorgeous hues inoculate their surroundings with a spirit of cheerfulness and satisfaction.

To flank an entrance, the taller growing varieties are particularly effective; for rock walls, terraces and rockeries, the prostrate types should be used. As single specimens out in the lawn, there is no more beautiful than the Colorado Blue Spruce. For windbreaks and backgrounds, use the Norway and Colorado Blue Spruce.

Remember our help and advice in beautifying your home is positively free, hence feel free to write us on any of these questions. We are sure that we can assist you.

All of our Evergreens are dug with a large ball of earth about the roots to insure safe transplanting. Crating and transportation are charged at cost.
